**MICROFLEX MAKES DONATION TO THE BREAST CANCER RESEARCH FOUNDATION
FROM SALES OF *COLORTOUCH®PINK* GLOVES**

ADDITIONAL 8,000 PAIR OF GLOVES FOR *Joy to Life* WALK

For immediate release - Microflex Corporation (Lake Forest, IL), a division of Barrier Safe Solutions International (BSSI) has announced a donation to The Breast Cancer Research Foundation® (BCRF). A leading provider of disposable latex and synthetic barrier protection products, Microflex made the donation as part of its corporate alliance partnership program with BCRF. Through this initiative, \$1 was donated to BCRF for each case of Color Touch® Pink disposable examination gloves sold.

"We are extremely pleased to make this contribution to assist in the exemplary work being done by The Breast Cancer Research Foundation® in funding important research to prevent and find a cure for breast cancer," said Mike Schoen, Medical Product Manager. *ColorTouch®Pink* was introduced in September 2009 and is utilized in medical, dental and laboratory settings. "Our customers have responded very positively to this new product and through their commitment to *ColorTouch®Pink* we are able to make this commitment to BCRF. I am also proud to announce that Microflex® has renewed the corporate alliance partnership program with BCRF for another year."

The Breast Cancer Research Foundation® provides critical funding for innovative clinical and translational research at leading medical centers worldwide, and increasing public awareness of good breast health. More than eighty-five percent of all funds raised by BCRF goes directly to grants for research and awareness programs.

In addition to the financial donation, Microflex also contributed 8,000 pair of *ColorTouch®Pink* gloves to a Joy to Life Cancer Walk on April 17th in Montgomery, AL. "It was rewarding to see so many of the walkers wearing *ColorTouch®Pink* to display their support for the cause," said Schoen. "We know that our customers have been satisfied with what this product provides in the workplace and we were pleased to have the gloves represent the commitment of everyone to this important cause."

ColorTouch®Pink patient examination gloves are made with powder-free premium latex and provide medical grade barrier protection. Since being introduced to the marketplace, *ColorTouch®Pink* has been recognized by Modern Hygienist as one of Top 30 New Products of 2009 and featured in First Impressions.

"Whether it is through the donation, or the contribution of gloves to the Joy to Life event, Microflex is committed to the fight against breast cancer in the same way that we are committed to innovating and producing superior barrier protection for working men and women across the country," said Schoen. "We thank our customers who have embraced our product and made possible these donations to BCRF."
